

Daniel Falkner

Software Architect & Lead Developer

Architect and lead developer for distributed systems. Designs target architectures from the business requirements and builds them hands-on or with a team, from Java and Kotlin back ends and React front ends to operations on Kubernetes.

Location: Bremen, Germany Email: daniel.falkner@example.org GitHub: dfalkner

REFERENCE PROJECTS

AtlasCore

Principal Engineer · Nordwind Telematik GmbH

09/2022–today

- Architecture ownership for 8 microservices, hexagonal with DDD
- CI/CD and security pipelines with continuous testing

Java, Kotlin, TypeScript · Quarkus, React · Kubernetes · PostgreSQL · REST/OIDC · messaging (Kafka, CloudEvents) · DDD

VIADUKT (road-data system)

Delivery Manager · State Office for Road Infrastructure

03/2019–08/2022

- Technical project lead, about 2,500 users, 12 people
- Agile transformation into five sub-teams

requirements engineering · software architecture · REST · Oracle DB · agile transformation

Web services & Kubernetes cluster for research projects

Lecturer · Weserbergland University of Technology

10/2016–02/2019

- Kubernetes cluster for more than 80 student projects

Java/Spring · REST · Kubernetes, Docker · MariaDB

CERTIFICATIONS

TOGAF® 9 Foundation

Enterprise Architecture

AWS Certified Solutions Architect

Associate – Cloud Architecture
