CORE COMPETENCIES

Go · Java Kubernetes PostgreSQL

Observability

PROFESSIONAL EXPERIENCE

Senior Backend Engineer

3/2019 – today

Delphi Systems GmbH, Berlin

- Design and operation of an event-driven microservice platform (Go, Kafka, Kubernetes).
- Introduced tracing and SLO-based monitoring; mentored four developers.

Software Engineer

9/2016 – 2/2019

Hellas Analytics, Athens

- Built a data pipeline for real-time analytics (Java, Spring Boot, PostgreSQL).

EDUCATION

2016 M.Sc. in Computer Science

TU Berlin

2014 B.Sc. in Computer Science

University of Athens

PUBLICATIONS

- **Tracing Strategies for Event-Driven Microservices.** ACM Queue, 2023. Compares tracing strategies for event-driven microservice architectures. [↗ Link](#)

PROJECT HISTORY

Delphi Systems GmbH – Senior Backend Engineer

03/2019 – today · Berlin · industry: logistics

Oracle platform (2019 – today)

Event-driven shipment-tracking platform with 40+ services.

Responsible for architecture, API design and Kubernetes operations.

Go · Kafka · Kubernetes · PostgreSQL

Freelance projects

2016 – 2019 · various industries

Booking API for a travel portal (2017)

REST API with payment integration, [case study](#).

Java · Spring Boot · MariaDB

SKILLS MATRIX

Scale 1–6: 3 basic · 4 advanced (in production) · 5 senior level (multiple projects) · 6 expert

PROGRAMMING LANGUAGES

Go		5
continuously since 2019		
Java		4.5
Python		3

INFRASTRUCTURE
