

Daniel Falkner

Software Architect & Lead Developer

Location: Bremen, Germany Email: daniel.falkner@example.org GitHub: dfalkner

Software Architect & Lead Developer (M.Sc.) with over 10 years of experience in full-stack development, cloud infrastructure, software architecture and technical project management. Focus: Java/Kotlin microservices (Quarkus, Spring), React frontends, Kubernetes platforms, DevOps and requirements engineering.

PROFESSIONAL EXPERIENCE

Principal Engineer, Platform & Delivery

Nordwind Telematik GmbH, Bremen

09/2022–today

- Led full-stack development of the “AtlasCore” platform, based on hexagonal microservices and Domain-Driven Design (Java, Kotlin, TypeScript; Quarkus, React, Kubernetes); provided technical leadership and mentoring for five developers.
- Implemented communication between distributed systems via REST with OIDC authentication, plus event-driven messaging via Apache Kafka and CloudEvents.
- Designed and built CI/CD and security pipelines (GitLab, Kubernetes) with continuous testing (JUnit 5, 85% coverage) and security gates for code and container scans.
- Drove requirements engineering (elicitation, specification, validation) in close collaboration with stakeholders.

Application Developer (part-time)

sports club · winery · physiotherapy practice and others

2015–today

- Member and fee management with online registration

TSV Wesertal e. V.

03/2023–11/2023
- Online shop with inventory-management integration

Falkenstein Winery

05/2019–02/2020
- Practice website with appointment booking

Brinkmann Physiotherapy

06/2016–10/2016

Delivery Manager (IT)

State Office for Road Infrastructure, Hanover

03/2019–08/2022

- Led the VIADUKT road-data system (around 2,500 users) as technical project manager, coordinating four areas: requirements engineering, development (two teams), testing and operations.
- Defined a unified software architecture (blueprint) and drove release planning.
- Drove the agile transformation of the development process: restructured the unit into five functional sub-teams and established Scrum.

Adjunct Instructor, Distributed Systems

Weserbergland University of Technology

10/2016–02/2019

- Developed REST web services and operated a Kubernetes cluster for student and research projects.
- Teaching: tutored the course “Distributed Systems” and supervised student theses.

EDUCATION

2016 **M.Sc. in Computer Science**
Weserbergland University of Technology

2013 **B.Sc. in Computer Science**
Weserbergland University of Technology

PUBLICATIONS

- **Adaptive Service Composition in Distributed Environments: A Heuristic Approach.**
Journal of Fictional Informatics, 2021. [↗ Link](#)
Presents a heuristic for runtime-adaptive composition of distributed services under changing constraints.
- **Event-Driven Architectures in Public-Sector Systems.** Fiction Conference on Software Engineering, 2020. [↗ Link](#)
Examines how event-driven architectures can modernise public-sector case-handling systems.

PROJECT HISTORY

Nordwind Telematik GmbH – Principal Engineer, Platform & Delivery

09/2022–today · Bremen · industry: telematics / software vendor

AtlasCore

09/2022–today

Design, development and architecture ownership of the “AtlasCore” platform: 8 microservices with multi-database support (H2, PostgreSQL), hexagonal architecture with Domain-Driven Design; technical leadership of five developers. Rollout to two customer cloud platforms; stepwise replacement of the legacy system via the strangler-fig pattern.

Java, Kotlin, TypeScript · Quarkus, React · Kubernetes · PostgreSQL · REST/OIDC · messaging (Kafka, CloudEvents) · DDD

Security pipelines & managed GitLab

01/2023–06/2024

Implemented the company-wide change project: build and security pipelines, consolidation of the tool landscape, training concept for 20+ employees.

GitLab · CI/CD · security pipelines · change management

Independent projects

2015–today · various industries · part-time alongside main employment

Member and fee management

03/2023–11/2023

TSV Wesertal e. V.

Web application for member, fee and course management with online registration and SEPA export.

PHP/Laravel · Vue.js · REST · MariaDB

Online shop with inventory-management integration

05/2019–02/2020

Falkenstein Winery

Shop including stock synchronisation and shipping interfaces.

PHP/Laravel · REST · MariaDB

Practice website with appointment booking

06/2016–10/2016

Brinkmann Physiotherapy

Website with online appointment booking and reminder emails.

PHP · JavaScript · MySQL

State Office for Road Infrastructure – Delivery Manager

03/2019–08/2022 · Hanover · industry: public sector

VIADUKT (road-data system)

03/2019–08/2022

Technical project lead for a system with around 2,500 users; coordinated four areas with technical leadership of around 12 people. Defined a unified software architecture (blueprint) and drove release planning with 20+ stakeholders.

Agile transformation: restructured the unit into five functional sub-teams and established Scrum.

requirements engineering · software architecture · REST · Oracle DB · agile transformation

Weserbergland University of Technology – Adjunct Instructor

10/2016–02/2019 · industry: research & teaching

Web services & Kubernetes cluster for research projects

10/2016–02/2019

Developed REST web services; built and operated a cluster hosting 80+ student projects.

Java/Spring · REST · Kubernetes, Docker · MariaDB
